Operation Bonfire: case board

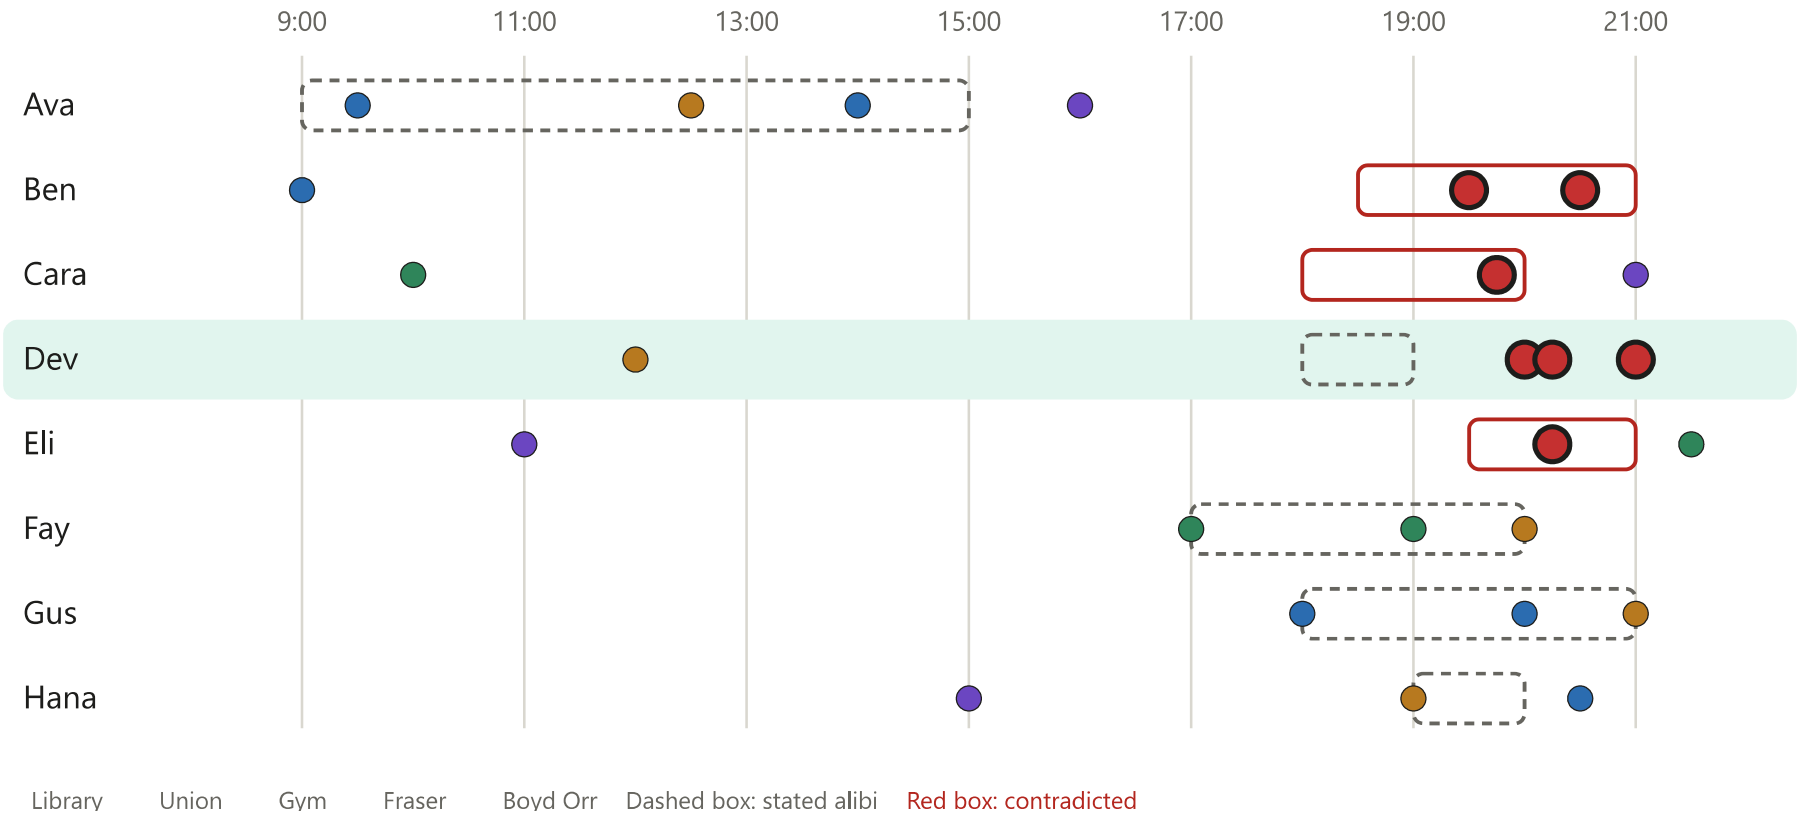

Prototype running on synthetic demo data. Real logs plug in through the adapter layer.

Recommendation

Dev is the likely kingpin: the most connected person (6 links), 3 late visits to Boyd Orr and 0 contradicted alibis. Likely conspirators: **Cara, Ben, Eli**, whose alibis the logs contradict. This is a lead for the investigator to check, not a verdict.

☑ AI claim extraction (untick to see the rule-based fallback)

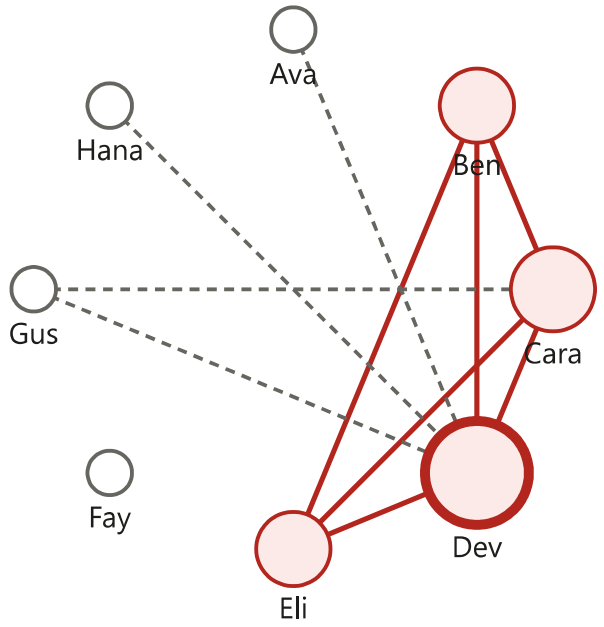

Timeline: who was where

Suspect ranking

Dev	Kingpin candidate	9
Ben	Likely conspirator	8
Cara	Likely conspirator	8
Eli	Likely conspirator	7
Ava	No flags	0
Fay	No flags	0
Gus	No flags	0
Hana	No flags	0

Connection network

Solid red: seen at Boyd Orr within 45 minutes of each other. Dashed: named by another student.

Case file: Dev (score 9)

Statement

> "I was in the Fraser Building around six."

AI-extracted, schema-validated: Fraser, 18:00–19:00

Findings

No contradictions found against the logs.

Named by others

- Ava saw Dev carrying boxes near Boyd

Score breakdown

- 3 late visits to Boyd Orr (+3)
- 6 links to other people (+6)

- Ava saw Dev carrying boxes near Boyd Orr
- Hana saw Dev meeting people near Boyd Orr
- Gus saw Dev with a large delivery

Logged movements

- 12:00 Union
- 20:00 Boyd Orr
- 20:15 Boyd Orr
- 21:00 Boyd Orr

Where AI is used: pulling where and when a student says they were out of free text (simulated here, an LLM returning validated JSON in the real build). Ranking
